

# SURF & TURF JUNIOR

Rearing of middle and large size breeds, with salmon and lamb

With high-quality proteins from lamb & salmon, our new Josera Surf & Turf Junior offers growing dogs an easily-digested and tasty menu for every day. This food for younger dogs contains all the important nutrients for healthy growing.

- Food for young dogs with lamb & salmon as exceptional protein sources
- Suitable for medium and large breeds
- With DHA to support brain development
- With L-carnitine and taurine to support cardiac function

## Grainfree

This recipe does not contain any grain and is suitable for a daily grainfree food for healthy and sensitive dogs.

## Optimal development

Valuable fatty acids from salmon support brain development. L-carnitine and high-quality proteins promote strong, lean muscles. Taurine and L-carnitine are important nutrients for the heart.

## Skeletal development

A well-balanced calcium phosphorus ratio, vitamin C, as well as manganese and copper, which are easy to absorb, support a strong bone structure and healthy joints.

### Feeding recommendation:

weight	Age (months)						
	1,5	2	3	4	5-6	7-12	13-20
10 kg	40 - 75 g	80 - 110 g	130 - 150 g	165 - 180 g	165 - 200 g	170 - 210g	
20 kg	60 - 115 g	130 - 155 g	220 - 270 g	295 - 355 g	310 - 360 g	285 - 400 g	
30 kg	75 - 190 g	175 - 210 g	275 - 330 g	355 - 420 g	390 - 440 g	400 - 470 g	350 - 420
40 kg	95 - 250 g	240 - 290 g	375 - 415 g	395 - 510 g	470 - 570 g	445 - 620 g	390 - 570
60 kg	120 - 260 g	275 - 335 g	460 - 525 g	550 - 700 g	680 - 830 g	750 - 870 g	700 - 780 g
80 kg	155 - 325 g	365 - 445 g	520 - 620 g	665 - 800 g	880 - 980 g	890 - 990 g	820 - 920 g

The recommended feed quantity is per animal per day. The recommended amounts are based on the weight of the adult dog. The optimal growth rate of the dog should be achieved thanks to a moderate supply of energy. If your dog is too big and heavy for his age, it is advisable to reduce the amount of food. An adequate supply of nutrients is ensured even with smaller portions. Please make sure your animal has fresh water at all times.

Analytical constituents per kg:		
protein	%	28.0
fat content	%	16.0
crude fibre	%	1.8
crude ash	%	6.9
calcium	%	1.40
